The best reference for a hotel is what its guests say about it.

This section of the site allows users to find out other guests' experiences in the same hotel and choose and book a selected hotel with peace of mind.

The application of the guestbook is directly managed by the hotel in real time, with the possibility of posting an unlimited amount of reviews, as well as scanned handwritten pages of the guestbook.

A website with a continually updated guestbook section is a greater attraction for both tourists and search engines that catalogue it.
